# Comfort and functionality

## Confort et fonctionnalité

### Self-mounting of ballast and optional hoist gear 2

Montage autonome du contrepoids et mécanisme de levage 2 en option

## Fast, easy erection

### Montage rapide et simple

The hydraulic connection to the crawler travel gear is made automatically by a quick-release coupler when the crawler carriers are installed.

Le raccord hydraulique avec les chenilles se fait automatiquement avec un raccord rapide lors du montage des chenilles.

## Crawler tracks

### Chenilles

The 3 ft 3 inch wide crawler tracks are as standard equipped with flat crawler pads. Optionally available are double grouser crawler pads with easily attachable and detachable polyamide plates. These offer advantages at sensible surfaces like e. g. industrial floors. Furthermore the polyamide plates are fully suitable for rough terrains.

Les chenilles de 3 ft 3 inch de large sont pourvues en série de tuiles plates. Des tuiles double nervure sont disponibles en option, avec éléments facilement amovibles en polyamide. Ces tuiles sont particulièrement idéales sur sols difficiles, tels que les terrains industriels. En outre, les tuiles polyamide sont adaptées à tous les terrains.

# High safety Haute sécurité

## Functional walking surfaces and steps Passerelles et marchepieds fonctionnels

Large grating areas facilitate safe movement on the crane. During the design of the walking areas, special attention was paid to easy and fast transportation and assembly possibilities.

Spacieuses surfaces en caillebotis permettant un déplacement en toute sécurité sur la grue. Lors de la conception des passerelles, l'accent a également été mis sur un transport et un montage simplifiés et rapides.

## Equipped for safety Équipé en toute sécurité

The ballast monitoring system compares the fitted ballast to the LICCON set-up state and a warning is output in the event of a discrepancy.

Grâce à la surveillance de lest, le lest monté est comparé avec l'état d'équipement de la LICCON et un avertissement est émis en cas de non conformité.

## Crane operation with side inclination Utilisation de la grue en inclinaison latérale

Additional operational possibilities are offered by the load charts programmed as standard for working with main boom and assembly jib on surfaces with an inclination up to 4°.

Les possibilités d'application de la grue sont étendues grâce aux tableaux des charges programmés de série permettant d'utiliser la grue avec une inclinaison latérale pouvant aller jusqu'à 4°.

# Great operational diversity

## Grande polyvalence

### High flexibility

#### Haute flexibilité

Due to its extraordinary cross-country mobility and the possibility to drive sensitively with full load, the LTR 1220 offers an extraordinary operation diversity.

Grâce à son excellent comportement en tout-terrain et sa souplesse de déplacement à pleine charge, la LTR 1220 permet une utilisation extrêmement flexible.

### Telescopic crawlers

#### Longerons télescopables

The chassis of the LTR 1220 can be hydraulically telescoped from the chassis width of 14 ft 9 inch to the intermediate width of 19 ft 3 inch or the maximum width of 23 ft 9 inch. Additionally the LTR 1220 also operates on an asymmetric track. Thus the full capacity can be utilised when working over the side at which the crawler is fully extended.

Les longerons de la LTR 1220 peuvent être sortis hydrauliquement d'une largeur de 14 ft 9 inch à une largeur intermédiaire de 19 ft 3 inch, ou à la largeur maximale de 23 ft 9 inch. Par ailleurs, la LTR 1220 travaille également sur voie asymétrique. La capacité peut ainsi être exploitée intégralement, lorsque la grue travaille du côté où le longeron est complètement sorti.

# Maximum load capacity over the fully extended crawler

## Capacité de charge maximale sur longerons complètement sortis

## The fully automatic telescoping system "TELEMATIK" Le système de télescopage entièrement automatique « TELEMATIK »

- Greater lifting capacities with longer booms and larger radii thanks to 'light' telescoping system
- Maintenance-free telescoping system
- Fully automatic telescoping
- Easiest control and monitoring
- Augmentation des capacités de charge grâce aux flèches plus longues et vastes portées garanties par un système de télescopage « léger »
- Système de télescopage sans entretien
- Télescopage entièrement automatique
- Utilisation simplifiée

# Intelligent crane control

## Commande intelligente de la grue

### LICCON2 – safe and comfortable - sécurité et confort

With the mobile control and display unit BTT Bluetooth Terminal erection operations, like the actuation of the jack-up cylinders and the track adjustment can be performed comfortably and safely with intervisibility. With the remote control on the LTR 1220, as well as the complete operation of all the crane movements, the crawler chassis travel can also be controlled. The unrestricted view of the crane and the load means that safety and convenience of operation can now be improved even further.

Les unités de commande et d'affichage BTT Bluetooth Terminal permettent de piloter les vérins de calage et le réglage de la voie sans danger et confortablement, en gardant un contact visuel. Outre le pilotage de tous les mouvements de la grue de la LTR 1220, cette commande radio à distance permet également le déplacement du train de chenilles. La visibilité optimale sur la grue et la charge est propice à une sécurité accrue et un meilleur confort.

## Remarks

1. The lifting capacities do not exceed 75 % of the tipping load according to ASME B 30.5. The crane's structural steelwork is in accordance with EN 13000 and ASME B 30.5.
2. For the calculation of the load charts at least a wind speed of 30 ft/s (9 m/s, 20 mph) and regarding the load a sail area of 1 m<sup>2</sup> per ton load and a wind resistance coefficient of 1.2 on the load have been taken into account. For lifting of loads with large sail areas and/or high wind resistance coefficients the maximum wind speed as stated in the load charts has to be reduced.
3. The lifting capacities stated are valid for lifting operation only (corresponding with crane classification according to ISO 4301-1, crane group A1).
4. Lifting capacities are given in kip.
5. The weight of the hook blocks and hooks is part of the load and therefore it must be deducted from the lifting capacities.
6. Working radii are measured from the slewing center.
7. The stated lengths of the telescopic boom are maximum values and may deviate slightly.
8. The lifting capacities given for the telescopic boom apply if the folding jib is removed.
9. Lifting capacities above 295,400 lb / 332,900 lb only with additional pulley block/special equipment.
10. Subject to modification of lifting capacities.
11. Lateral inclination  $\pm 0.3^\circ$ .
12. The data of this brochure serves only for general information. All information is provided without warranty. Instructions for the correct commissioning of the crane please take from the operation manual and the load chart book.
13. The pictures contain also accessories and special equipment not included in the standard scope of delivery.

## Remarques

1. La capacité de charge ne doit pas dépasser 75 % de la charge de basculement conformément à ASME B 30.5. La structure métallique de la grue est conforme à EN 13000 et ASME B 30.5.
2. Une vitesse de vent de 30 ft/s (9 m/s, 20 mph) minimum, une surface de prise au vent de 1 m<sup>2</sup> par tonne ainsi qu'un coefficient de résistance au vent de la charge 1,2 sont pris en compte pour le calcul des tableaux de charge. Lorsque des charges ayant une surface de prise au vent et/ou un coefficient de résistance au vent plus élevé(e)(s) sont levées, la vitesse de vent maximale indiquée dans les tableaux de charge doit être réduite.
3. Forces de levage pour application de grue de montage (correspond à la classification de grues selon ISO 4301-1, groupe de grues A1).
4. Les charges sont indiquées en kip.
5. Le poids du crochet de levage resp. de la moufle à crochet est une partie de la charge et doit donc être déduit de la capacité de charge.
6. Les portées sont calculées à partir de l'axe de rotation.
7. Les longueurs indiquées pour la flèche télescopique sont des valeurs maximales et peuvent légèrement varier dans la réalité.
8. Les charges indiquées pour la flèche télescopique sont valables lorsque la fléchette pliante est démontée.
9. Les charges supérieures à 295,400 lb / 332,900 lb seulement avec moufle additionnel/équipement supplémentaire.
10. Charges données sous réserve de modification.
11. Inclinaison latérale  $\pm 0,3^\circ$ .
12. Les données de cette brochure sont données à titre informatif. Ces renseignements sont sans garantie. Les consignes relatives à la bonne mise en service de la grue sont disponibles dans le manuel d'utilisation et le manuel de tableaux de charge.
13. Les figures contiennent également des accessoires et des équipements spéciaux non inclus de série dans la livraison.
